WALL VISION

UNIQUE LIFE STYLE DISPLAY SYSTEM

Now you can have a large dark flat screen set into your wall(or cupboard) when switched on using a remote control,this becomes ultimate HOME CINEMA SCREEN.This large screen size 70", 80" or 100" diagonal is compatible with all formats of Video,DVD,TV,PC,even HDTV and video games.DISPRO WALLVISION combines the very latest in digital projection and optical screen technologies to bring this vision to reality.Use them as:-

*** LARGE SCREEN TV * HOME CINEMA * LARGE PC MONITOR * VIDEO GAMING * INTERACTIVE COPYBOARD**

actual photograph

WallVision is a self contained rear projection enclosure, ready constructed so that the screen can be easily set into an opening cut in any wall or partition. This does not require any special cooling so can be boxed in to form a simple floor to ceiling screen wall with a side walkin enclosure to house all the associated A/V equipments. This way your viewing is FREE from all equipments and cables.

REAL ELEGANCE

This new LIFE STYLE display has nothing VISIBLE- nothing on the ceiling,no shiny bezel on the wall, no cables and no buttons,just a window in the wall which comes to life at a touch of your remote control .Choice of handmade artistic frames to décor your drawing room which looks like a painting on the wall.

IMMERSIVE EXPERIENCE

The black levels of the screen, coupled with the sheer size of the screen,delivers the most intense viewing experience believable. No front projection screen can match this immersive experience.Only WallVision can provide true to life like out of the window experience with our INTENSAA dark tint screen.

STUNNING VIDEO QUALITY

The latest digital projection technology provides smooth video with razor sharp pictures and stunning colours.Dark tint screen delivers highest black levels for true lifelike high contrast colours.

DAYLIGHT VIEWING

Unlike front projection systems,DISPRO WallVision is not affected by lights ON Since the screen is anti glare,provides excellent daytime TV viewing.

RAZOR SHARP PC SCREEN

This high definition screen displays perfect enlarged PC images(SXGA+ or higher) ideal for holding meetings, giving presentations, video conferencing. Full screen can be converted into interactive display with our ePen technology. A unique and complete MULTIMEDIA CENTRE.

WallVision is perfectly positioned for best viewing for people sitting on sofa, chairs with widest 160 viewing angles. All latest digital projectors now use low noise cooling fans,when housed behind the screen, the sound is unaudible,leaving the viewer to enjoy the best soundtrack. Most digital projectors using UHP lamps with lamplife of 3000 To 4000 hours,after which they can be easily replaced at a nominal cost.
